Adopting a Culture of Comfort: Dementia Care without Drugs

Tena Alonzo, MA
Director of Education & Research
Co-director Comfort First
Beatitudes Campus
Session Objectives

1. Describe what to expect from the person experiencing mild, moderate or advanced dementia

2. Describe three things that will promote comfort for people with dementia

3. Define and describe at least three positive outcomes from implementing a comfort culture
## Progression of Dementia

<table>
<thead>
<tr>
<th>Mild Impaired memory; Personality changes; Spatial disorientation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Moderate or Mid-Stage Confusion; Agitation; Insomnia; Aphasia; Apraxia</td>
</tr>
<tr>
<td>Severe or Late Stage Resistiveness; Incontinence; Eating difficulties; Motor impairment</td>
</tr>
<tr>
<td>Terminal Bedfast; Mute; Intercurrent infections; Dysphagia</td>
</tr>
</tbody>
</table>

(Hurley & Volicer, 1998)
The Resilient Human Brain

- People with dementia are experts on their own comfort
- Our emotions are intact and we can receive information from the world into our limbic system
- Information is transferred through our senses
- When verbal communication is compromised we communicate through our behavior/actions
What is Comfort?

Merriam-Webster’s definition
1. “To give strength and hope to”
2. “To ease the grief or trouble of”

Synonyms:
assure, cheer, console, reassure, soothe

Antonyms:
Distress, torment, torture, trouble
The Clinical Definition of Comfort

Comfort care that is holistic in nature and includes interventions which address symptom control, psychological needs of patients and families, quality of life, dignity, safety, respect for personhood, and an emphasis on the use of intact patient abilities and manipulation of the environment.

Why does Comfort Matter?

Questions to consider…

- How do we choose to live?
- How do we act when discomfort happens?
# Medical Model Versus Comfort Model of Care/Service

<table>
<thead>
<tr>
<th>Medical Model</th>
<th>Comfort Model</th>
</tr>
</thead>
<tbody>
<tr>
<td>Focused on the physical body and cure</td>
<td>Focused on body, mind and spirit</td>
</tr>
<tr>
<td>Care/service is driven by the medical provider</td>
<td>Care/service is driven by the person receiving care/service</td>
</tr>
<tr>
<td>Emphasis on staff for task completion</td>
<td>Tasks are scheduled according to a person’s needs and wants</td>
</tr>
<tr>
<td>Staff members are instructed not to get close to “patients”</td>
<td>Staff members are encouraged to “know the person”</td>
</tr>
<tr>
<td>Frequently sees family members as problems</td>
<td>Understands that family members experience problems</td>
</tr>
</tbody>
</table>
Creating A Comfort Culture

1. Educates families and about what to expect from the person with dementia
2. Adopts policy and practice where comfort is the goal for everything
3. Examines and retools organizational or facility systems to be dementia-friendly and personalized
A Comfort Culture Defined

- Individualized all routines including sleep, dining and bathing
- Liberalized all diets consistent with the ADA 2010 position paper
- Utilized a soft approach during caregiving with those we serve
- Aggressively identifies and treats physical pain
- Continuously observes each person’s actions for discomfort and fixes it
A Comfort Culture Defined

- Families are essential helping staff understand a person is comfortable or not.
- Human behavior is a legitimate form of communication.
- Reviewing dining and bathing schedules/methods can be a good place to start.
- Making comfort the goal of every experience for the person with dementia is the key.
The great myth...

“People with dementia display dementia-related behavior and there’s **NOTHING** we can do about it.”
Common dementia-specific behaviors

- Resists care
- Refuses medication
- Curses
- Disrobes
- Exit Seeking
- Calls out
How dementia impacts human behavior-Moderate Dementia

- Difficulty with short and long – term memory. Struggles to learn new things
- Difficulties with understanding and being understood
- Knows comfort and discomfort
- Can’t self regulate emotions
- Often easily upset or frustrated
- Can become fearful
- May misinterpret the actions of others
How dementia impacts human behavior—Advanced Dementia

- Limited/no short and long-term memory—often lives in the moment
- Can’t learn new information or pick up new routines
- Unable to carry on meaningful conversation
- May appear withdrawn and can have difficulty interacting or responding to surroundings
## Resists care/service road map

<table>
<thead>
<tr>
<th>Dementia-specific behavior</th>
<th>What is the person communicating?</th>
<th>Possible remedies</th>
</tr>
</thead>
<tbody>
<tr>
<td>Resists care/service</td>
<td>Physical pain</td>
<td>Pain medication, repositioning, bed rest, ambulation</td>
</tr>
<tr>
<td></td>
<td>Fearful</td>
<td>Slow down, soft approach, back off, Don’t reason or confront</td>
</tr>
<tr>
<td></td>
<td>Doesn’t want to</td>
<td>Identify personal routine, back off</td>
</tr>
</tbody>
</table>
## Calls Out/yells Road Map

<table>
<thead>
<tr>
<th>Dementia-Specific Behavior</th>
<th>What is the Person Communicating?</th>
<th>Possible Remedies</th>
</tr>
</thead>
<tbody>
<tr>
<td>Calls out/yells</td>
<td>Physical pain</td>
<td>Give pain medication, reposition in bed or chair, ambulate</td>
</tr>
<tr>
<td></td>
<td>Boredom</td>
<td>Use the five senses to engage</td>
</tr>
</tbody>
</table>
Basic Road Map to Comfort

<table>
<thead>
<tr>
<th>Dementia-specific behavior</th>
<th>What is the person communicating?</th>
<th>Possible remedies</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Comfort-focused behavior management tips

1. Make comfort the goal—people who are comfortable don’t hit, yell, curse or express other challenges
2. Don’t confront or reason
3. Go slow
4. Validate beliefs
5. Report evidence of physical pain
Support for a Comfort Culture

- Center for Medicaid & Medicare Service
- New York Times
- Chicago Tribune
- Boston Globe
- Global Mail
- BBC
- AARP
Cost and a Comfort Culture

- No change in staffing ratios
- Little turnover and minimal call offs
- Cost reduction in many areas
- Waiting lists/stellar reputation
- Few family concerns
- Great state/federal surveys
Final thoughts

- Adopting a culture of comfort has a positive impact on people with dementia.
- Understanding how dementia effects the person with dementia gives us insight into how important comfort is for them.
- Human behavior is a form of communication that is present long after the ability to verbalize is gone.
- We have the power to reduce dementia-specific behaviors by adopting a culture that makes comfort the goal of everything we do.
- Long-term care organizations benefit greatly from adopting a culture of comfort for people with dementia.
Thank you!
